

Shubham Sevda

Software Engineer +91 9867897913 | Mumbai, India

shubhamsevda@gmail.com

Software engineer been pushing code for more than 10 years, helped bring multiple startups' visions to life. Committed to excellence. In the digital world, I craft interfaces and dive into coding intricacies. Beyond screens, I find solace and joy spending time with family. My life blends tech and nature, coding sessions & fitness.

EXPERIENCE

Soundmap (acquired)

Engineering Lead

Sep 2024 - Sep 2026 • 2yrs

New York, USA | www.soundmap.gg

- ◆ Led team of 5 engineers backend and infrastructure engineering for a map-based music collectibles app (React Native/Expo, Node.js/TypeScript on GCP/GKE), owning a tRPC/ PostgreSQL architecture production traffic on a 96 vCPU / 600GB+ Cloud SQL instance.
- ◆ Drove database performance at scale through index optimization, autovacuum tuning, and read-replica infrastructure with app-level dual-pool routing; resolved cold-cache thundering-herd and Redis/Valkey OOM incidents in production.
- ◆ Cut cloud spend by rightsizing GKE node pools and cleaning up Artifact Registry, saving ~\$2000/month, alongside query optimization across high-traffic tables.
- ◆ Designed and shipped end-to-end features coordinating design, implementation, and rollout across the team.
- ◆ Established the app's security posture, including a homegrown device-attestation layer (iOS App Attest, Android Play Integrity) verified against the backend and remotely toggleable certificate pinning via Firebase Remote Config.

Postpay

Senior Software Engineer

Aug 2021 - Sep 2024 • 3 yrs 1mo

Dubai, UAE | www.postpay.io

- ◆ Lead and mentor frontend team, conduct code reviews, ensure high-quality standards. Collaborate cross-functionally, gather requirements, define scope, use agile methodologies for project execution.
- ◆ Develop scalable web apps with ReactJS, NextJS, TypeScript, integrate APIs with Axios, utilize GraphQL, RESTful APIs for data manipulation.
- ◆ Lead push provisioning with Apple and Samsung team and implemented Postpay card in React Native consumer app, implemented microservice in NodeJS handling payload manipulation using cryptography.
- ◆ Built Postpay widgets written in vanilla javascript used by thousands of merchants
- ◆ Configure ESLint, Husky for code quality, optimize maintainability, readability.
- ◆ Lead integration team building multiple plugins for shopify, wordpress and opencart. Convert monolith codebase into micro frontend architecture which enabled us to onboard multiple loan providers

Mine'd(now Felt) (acquired by Journey)

Technical Lead

July 2019 - Aug 2021 • 2 yrs 2mos

New York, USA | www.linkedin.com/company/thefeelingsco

- ◆ Attended Techstars 2021
- ◆ Lead Engineering team and served as Technical Lead, Designed and implemented the architecture for a backend system that scaled to support 100,000+ users with 99.9% uptime. 10,000 daily active users (DAU)
- ◆ Successfully integrated video streaming capabilities into the backend using Agora Platform APIs, enabling real-time, high-quality video communication. This feature enhanced user experience and expanded the platform's functionality, supporting seamless, low-latency video interactions
- ◆ Partnered with the product manager to design engineering sprints, aligning technical tasks with product goals. This improved sprint efficiency ensuring timely feature releases and smooth cross-team communication.
- ◆ Built a scalable backend using Node.js, Express, Postgresql and Docker containers. Hosted on AWS elastic container service with Autoscaling.
- ◆ Built React Native apps for both consumer and experts to host live sessions and explore sessions.

Dough

Frontend Lead

May 2018 - July 2019 • 1 yr 3mos

San Francisco, USA | www.doughcrm.com/

- ◆ Lead Frontend team, conducted code reviews, and ensured code quality.
- ◆ Scheduled and facilitated meetings with stakeholders to align on project timelines.
- ◆ Developed responsive web app enabling lead and schedule management.
- ◆ Built React Native app for network marketers enabling them to manage their leads, payments and contacts at a single place.
- ◆ Demonstrated problem-solving skills and leadership in team collaboration.
- ◆ Gathered project requirements and translated them into actionable tasks.

SKILLS

JavaScript

Python

Java

Ovanah

Frontend Engineer

Apr 2017 - May 2018 • 1yr 2mos

San Francisco, USA | www.ovanah.com

- ◆ Spearheaded frontend development, ensuring adherence to web standards and best practices.
- ◆ Developed responsive web designs with HTML5, CSS3, and SASS for optimal user experience.
- ◆ Implemented a marketplace for selling apparel and built a platform for merchants to manage inventory, orders, and payouts.
- ◆ Braintree and stripe integration for the merchant dashboard to enable seamless payouts.
- ◆ Strong attention to detail and problem-solving abilities, ensuring efficient and effective frontend development processes.

Nodd

Android Developer

Mar 2016 - Apr 2017 • 1yr 2mos

Mumbai, India | www.noddapp.com

- ◆ Developed and deployed a fully functional Android application, leveraging Java and Android SDK, improving user engagement by 50%
- ◆ Integrated RESTful APIs to enable seamless data exchange between the app and backend services, enhancing the user experience.
- ◆ Develop real time chat functionality boosting community engagement
- ◆ Designed and implemented a custom MapView for users to explore events and meetups nearby. schedule events, and create detailed profiles
- ◆ Implemented robust security protocols to safeguard user data and ensure compliance with industry standards.

EDUCATION

Birla Institute of Technology, Mesra

Bachelor of Computer Science

May 2012 - Apr 2016

Ranchi, India

Internship at Intel, Bangalore

Courses:

OOP in C++, Compilers, Algorithms, Operating Systems, Data Structures

Jayshree Periwai High School

Senior secondary education

2012

Jaipur, India

India International School

Secondary education

2010

Jaipur, India
